## About Me

I am an Informatics Engineering student with strong interests in web development, software engineering, and IoT. My background as a content creator and former professional e-sports player has strengthened my creativity, communication, and teamwork skills. I enjoy building websites, applications, and IoT-based solutions while continuously exploring AI and Machine Learning technologies.

## Education

### SMA Negeri 1 Bumiayu

IPS  
2018 - 2021

### Universitas Esa Unggul

Computer Science  
2022 - Present

## Skills

Web Development

Software Engineering

Mobile App Development

IoT Development

Machine Learning & AI

Database Management

UI & UX Designers

Content Creation

Teamwork & Leadership

Problem-Solving & Creativity

Editing Skills

## Language

- English
- Bahasa

## Experience

### Content Creator

2015 - Present

Freelance

- As a content creator, I have been producing creative content across platforms such as TikTok, Instagram, YouTube, and Facebook. I am experienced in live streaming, building audience engagement, and developing effective content strategies. This journey has also strengthened my personal branding, enabled collaborations with sponsors, and sharpened my public communication skills.

### Student Organization - ICT Division (OSIS)

2018 - 2020

SMA Negeri 1 Bumiayu

- During my role in the ICT division, I managed the school's official social media accounts, designed creative materials such as pamphlets and banners, and documented school events. I contributed to developing digital communication strategies, led a creative team, organized technology workshops, and produced video content for school profiles and event documentation.

### Professional E-Sports Player

2019 - 2021

XCN Esports & Geek Fam

- As a professional Mobile Legends player, I competed at both national and regional levels with XCN Esports and Geek Fam. I gained valuable experience in team strategy, communication, and leadership by training and mentoring junior players. I also built a strong personal brand through live streaming and content creation, while collaborating with sponsors for promotional activities.

### Web Developer & Software Engineer

2022- Present

Freelance

- I focus on developing web, mobile, desktop, and IoT-based applications. My work involves building efficient systems, integrating modern technologies, and delivering user-friendly solutions tailored to client needs.

## Project

### Personal Web Portfolio

An interactive portfolio website showcasing projects and professional experience.

### Color Blindness Detection App

A mobile and desktop application designed to detect color blindness through color recognition.

### AIS Detection App

A mobile application powered by AI and Machine Learning to assist in identifying the likelihood of Adolescent Idiopathic Scoliosis (AIS).

### IoT Air Quality Monitoring

An IoT device integrated with a mobile application to measure air quality.

### IoT Heartbeat Monitoring System

An IoT device connected to a local web server for monitoring heart rate.

### Coffee Shop Website

A web-based platform for coffee shop ordering and information.

### Village Website

A village information system providing public services and community updates.
